- ⊙ Track Profitability by Customer, Route, Truck, Driver
- ⊙ Tie transactions together as they move through MAS 90 and MAS 200 Accounts Receivable, Inventory Management, Sales Order, and General Ledger

You know it makes sense to dispatch fuel and lubricants “just in time” when tanks are nearly empty but before the customer runs out. And manual scheduling is time-consuming, frustrating and error prone.

Now, with DM2 Delivery Scheduler™, you have an automated keep-full system for lubricants and fuels.

Delivery Scheduler allows you to set up automated schedules to fulfill regular deliveries efficiently, saving you time and effort while increasing your profit margin.

- Dramatically reduce the cost of delivery
- Provide better service to your customers
- Automatically generate dispatch orders by route and vehicle
- Choose from variable delivery schedules
- Link dispatch operators to sales and accounting functions

Route	Truck	Stop	Date	Product/Order	Name	City
R1	OUR TRUCK	01	06/07/02	S-0001067	SOUTHWEST TRUCKING,	CHICAGO

R2	DELIVER	03	06/20/02	20-602623	JEFFERSON TRUCKING	

# DM2 Delivery Scheduler™

## FEATURES

### Relationship Drops

Automatically produce tickets for nearby tanks when a "Relationship" delivery is scheduled, to save long runs back to zones just fulfilled. Use this function to assist in optimizing your deliveries.

### Powerful Account Look-Up

Gain instant visibility to your customer data by searching on any part of a customer name, address, phone number, ZIP code, city, and many more. You can even set multiple selection criteria per user.

### Online Order Taking

Enhance your staff's ability to turn inquiries into orders by providing instant credit checking and delivery history while the caller is on the phone. Also provides for "quick-print" tickets and addition of delivery notes or instructions as a natural part of the order-taking procedure.

### Multi-Drop Scheduling

Assign multiple tanks with different delivery schedules and intervals to a specific Accounts Receivable account, allowing for maximum credit control without sacrificing delivery efficiency. This scheduling option is perfect for landlords and property managers with multiple properties.

### Multiple Price Levels

Price tickets for your customers at several levels. Each price level may have a schedule of quantity breaks associated with that level. This helps make sure your pricing agreements are honored - especially with your high-volume commercial accounts.

### Unlimited Memo Recording

Keep as many notes about your customers as you wish. You may even organize them by category, such as credit conversations, equipment specifications, installation quotes, repair notes, and delivery notes. A reminder date can be specified for each memo so your sales staff or credit personnel can easily recall their follow-up calls.

### Management and Sales Reporting

You can keep statistics like number of deliveries, total gallons per delivery, and average gallons per delivery on a month-to-date and year-to-date basis, by driver, and by truck. You can calculate customer profitability on MTD and YTD bases.

The image shows two overlapping software windows. The top window is titled "Customer Tank Maintenance" and contains fields for Customer (0002010), Location Code (100), Tank Number (0342), and Location (NORTH SIDE OF BLDNG). It also shows Tank Size (1,500 Usable, 1,450 Opt, 1,200) and Customer PO (35-5689). The bottom window is titled "Automatic Recurring Delivery Scheduling" and shows Selection Criteria (Customer No. 0002010, Express Fuels, Inc. Daily), Location Code (100), and Tank Code (0342). It includes a Recurrence Pattern section with radio buttons for Daily, Weekly, and Float, and a Starting Date of 07/01/03 and Ending Date of 07/31/03. Both windows have "Accept", "Cancel", and "Delete" buttons.

## AVAILABILITY:

MAS 90 or MAS 200  
Version 3.71 or later
