

# DM2 Software/SMARTLogix Truck Automation Integration

DESIGNED FOR:

**Sage  
MAS 90  
MAS 200**

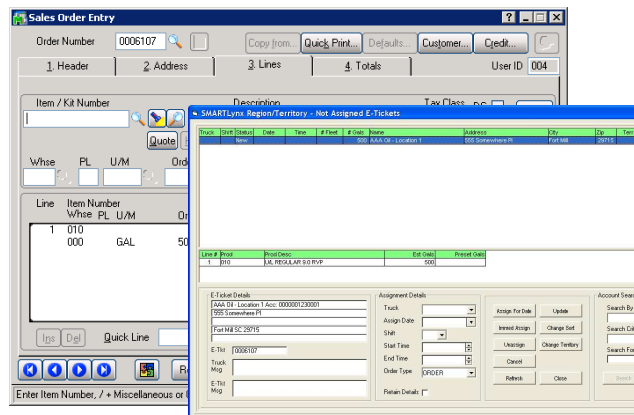

## SMARTLogix Integration Features:

- ⊙ Automatically send Sales Orders to SMARTLogix Dispatch and Driver Handhelds instantly
- ⊙ Orders can be entered in either system and automatically synchronized
- ⊙ Real-time Credit Checks regardless of how orders are entered
- ⊙ Orders created in DM2 Dispatch Scheduler can be automatically sent to the SMARTLogix system
- ⊙ Includes Shipping Instruction memos
- ⊙ Order changes in DM2 are automatically sent to SMARTLogix depending on order status
- ⊙ Automatically populate Bill of Lading information from SMARTLogix
- ⊙ Provides summary or detail transaction information for fleet fueling invoicing

**DM2 Software** - since 1989, DM2 has been developing and supporting back office/ERP systems specifically designed to provide petroleum marketers with the tools they need to automate their operations and maximize profit margins. In partnership with **SMARTLogix™**, DM2 has taken truck automation to the next level. SMARTLogix Logistics solutions keep your petroleum distribution operation running smoothly by simplifying dispatch and tracking product movement throughout the entire delivery process. Real-Time inventory information, GPS tracking and exception reporting are just a few examples of the feature-rich SMARTLogix solution. By adding the SMARTLogix Truck Automation module to your DM2 *Petroleum Insights* back office/ERP system, you can further streamline your delivery and fleet fueling operations while improving your cash flow.

Streamline operations and eliminate double entries and keying errors by automatically sending priced and taxed orders from the MAS90/MAS200 Sales Order module to the SMARTLogix Dispatch module and Handheld driver units instantly. Or, enter orders into the SMARTLogix Dispatch module or on the handheld units. Either way, both systems are automatically synchronized and credit is checked in real-time. Provide fleet (wet hosing) accounts with consolidated, summary invoices via the Sales Order module or send per vehicle transaction information to DM2's CardLink module for detailed invoicing.

Improve cash flow by updating the Sales Order module instantly after each delivery is made via SmartLogix's Wireless technology. Operators can easily see which deliveries are ready to be billed and select and convert orders into invoices with just a few mouse clicks.

See reverse for list of features

# DM2 Software/SMARTLogix Truck Automation Integration

## BENEFITS

### Eliminate Manual Entries

Eliminate double entries and keying errors by automatically populating Customer Account or ShipTo addresses, Sales Order, Bill of Lading and Inventory Item Maintenance screens between systems in real-time.

### Improve Inventory Control

Maintain up-to-the-minute inventory control with real-time wireless communications. Also integrates with SMARTank tank monitors.

### Increase Cash Flow

Reduce time from delivery to invoice by automatically capturing delivery information in real-time. Captures signatures digitally to verify proof of delivery.

### Increase Margins

Increase dollar margins per gallon delivered by identifying *Best Buy* pricing opportunities and maximizing delivery routing with GPS logistics tracking.

### Reduce Paperwork

Eliminate the paperwork associated with order entry, dispatch and delivery functions.

## ABOUT SMARTLogix

SMARTLogix, Inc. is the technological leader in the development of a digital platform for the petroleum logistics business. Their SMARTruck System is a fully integrated hardware and software solution for order entry, dispatch, real-time truck communication, and delivery tracking. The real-time capability of the system allows business transactions to flow according to the needs of the business without delays from entering paper tickets or waiting for data transfer at the base location. Alerts and alarms provide real-time information availability to management regarding critical performance metrics. SMARTLogix's primary market is the petroleum logistics business in North America. Their target customers are distributors of petroleum products (bulk fuels, lubes) as well as end users of petroleum products who operate their own fleets.
